Industrial Exhibition in conjunction with Euro-Par 2006

Our supercomputers help people go to space, and to the supermarket.

Linux Networx supercomputers help solve some of the world's most difficult challenges. Our customers use our systems to explore the galaxy, develop stronger and more reliable cell phones, find new energy resources, visualize faster and more efficient aircraft, and design safer airbags for our cars – just to name a few.

At Linux Networx, our systems are trusted because we know Linux supercomputing better than anyone else. Which means we'll be able to help solve your challenges better than anyone else.
